Hi, I'm Alex I live in  
rural area of Spain. I'm  
young and I have a  
medical condition

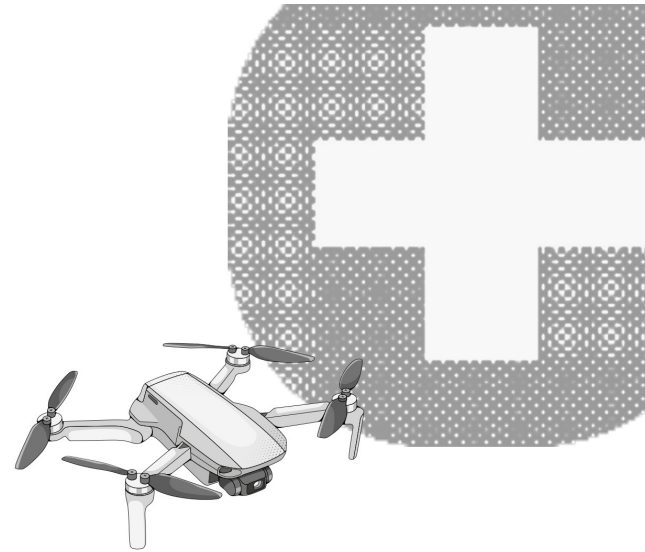

I have suffered getting medical care because I'm far away from the city . so me and the other young people in the village we decided to find a solution for this problem.

**MEDRONS**

INNOVATION PROJECT

Say Welcome To MEDRONS

Medrons helped us getting medicine into our homes from the big city .using the drones technology and a stations in the rural area it made it easy for us to get the medical care needed

This solution was very cost effective because we don't need to travel and helpful in many ways . Thanks to the youth we made a big deference in the medical industry in rural area
