Hi, I'm AMINA .I live  
in rural area where  
we have a lot of  
farms but difficult  
to get fresh food

We found that the climate changes is a cause of making some of the food become rotten . So some of the youth in the local made a new way to get fresh food

After bunch of ideas from the young people they provided us  
with an app to order fresh food directly from local farms  
once it gets ready

Co-funded by

The App made it easy for us to get fresh food and raise awareness about the climate and how it effect the food in any way

Thanks to the youth and their ideas we managed to make  
a good impact on our environmental education and  
awareness
