RURAL
YOUTH
OF EUROPE

Hi there , I'm Iria. I'm a young activist . I love the environment and its everything we have as youngsters . we suffer from a big problem called climate change

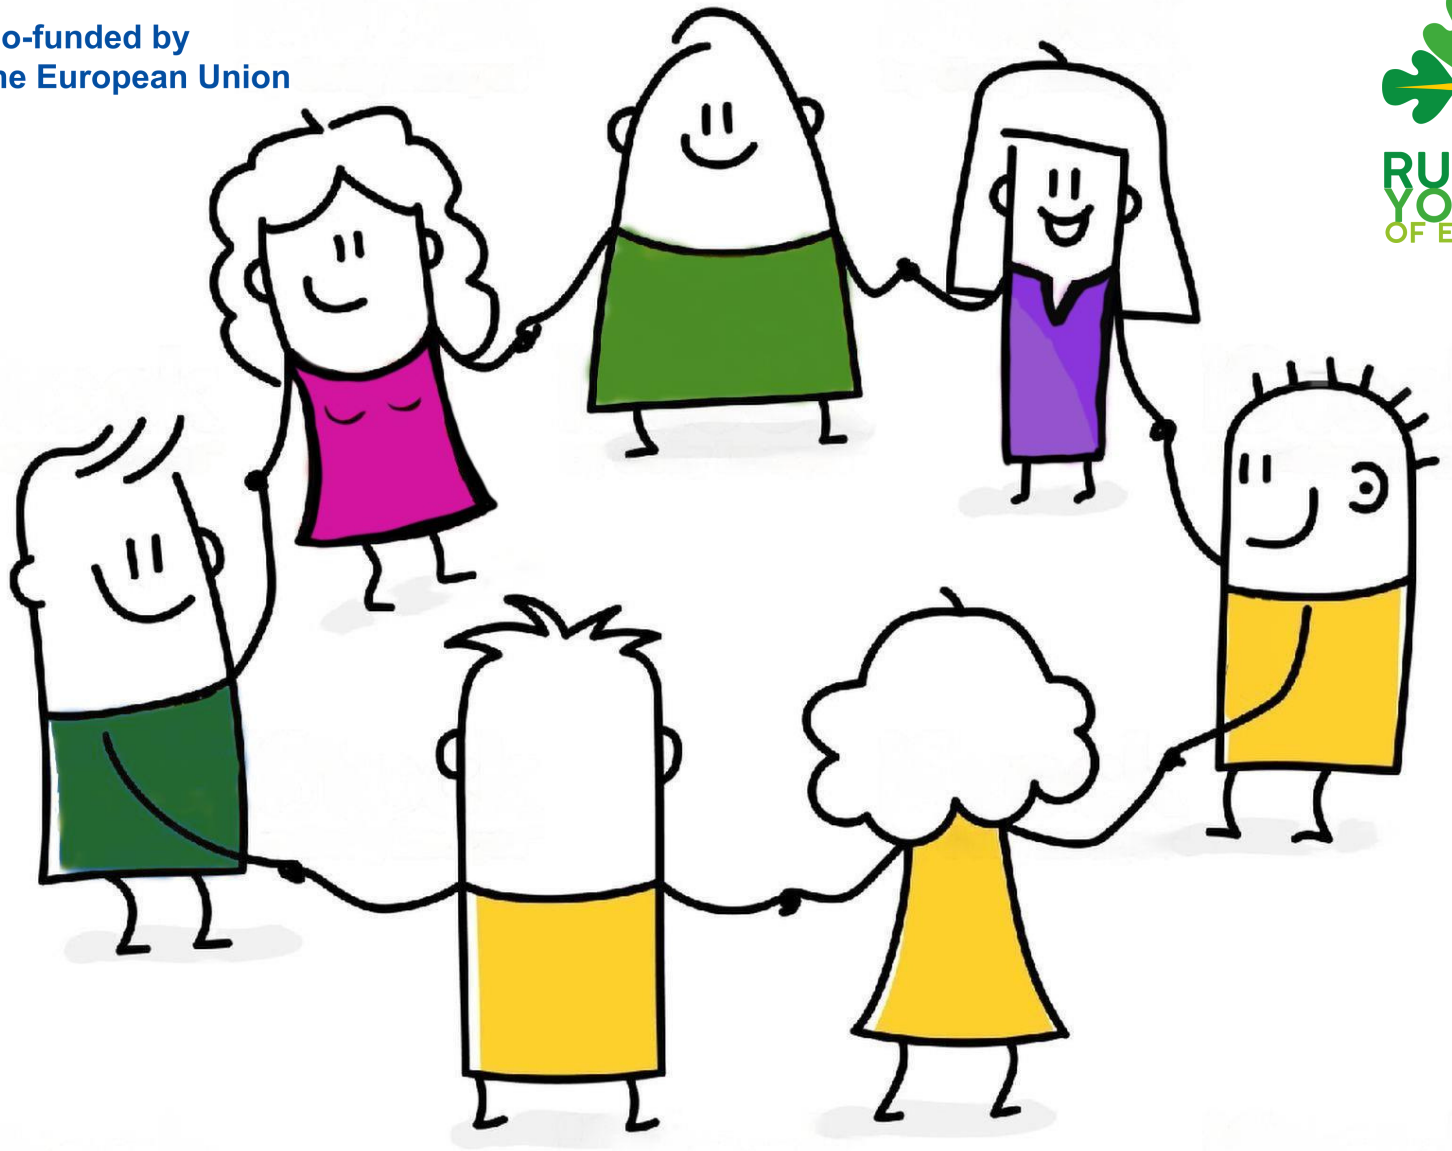

The problem with climate is our carbon footprint . a lot of young people doesn't know what it's effect on us . some youth lack the awareness and interest .some lack the education needed .

In order to get the intention needed for this we need to design of education campaigns , social media campaigns to promote activities and also carbon footprint limit
